

Driving Real Impact Across the Dealership Landscape

At SD Digital, we deliver tailored digital solutions to meet the unique challenges of modern dealerships. From automation and analytics to custom development and digital modernization, our goal is simple: drive measurable bottom-line results. We help dealerships streamline operations, boost accuracy, and unlock new efficiencies to stay ahead and gain a competitive edge in a rapidly evolving market.

Digital Modernization

We help dealership owners, finance teams, and IT leaders identify root causes of business challenges and solutions through a digital-first approach.

Real-World Impact

Our team partnered with one of Midwest's largest dealerships to reimagine accounts payable processes, building a business case for automation that resulted in **\$2M in cost savings**.

Intelligent Automation

We enable customers to leverage AI, machine learning, and bots to accelerate operations, reduce errors, and focus on high-value work.

Real-World Impact

A dealership was spending excessive time entering and re-entering new vehicle invoices. We automated the process of invoice ingestion into the DMS and integrated it with the website, **saving over 2,000 hours annually**, reducing labor from 2 FTEs to a fraction of one.

Data Analytics

We guide dealerships in adopting modern tools for budgeting, forecasting, reporting, and predictive analytics to drive informed, strategic decisions.

Real-World Impact

A client manually compiling various reports from CDK, a time-consuming task due to the system's structure. We automated report generation and distribution, **saving 250 hours per year**.

Custom Development

We recognize that every client is unique and collaborate to build tailored solutions that address operational, technical, and knowledge gaps.

Real-World Impact

A client struggled with the complexity of financial report layouts required by various manufacturers. Our data analytics team helped implement a performance management system to **streamline reporting, increase accuracy, and avoid hiring additional accounting resources.**
