

RESPONSIBLE AI SOLUTIONS

Schneider Downs helps organizations establish the governance, policies, and risk management controls needed to deploy artificial intelligence safely and responsibly. We work with executive, risk and technology leaders to design practical AI governance frameworks supported by clear policies, procedures and operational standards.

By integrating Responsible AI principles into governance and enterprise risk programs, organizations gain clear visibility into how AI is used, how decisions are made and how risks are identified and managed across the AI lifecycle. The result is an end-to-end Responsible AI capability that aligns people, processes and technology to support ethical, transparent and compliant AI adoption.

AI Governance Framework

AI Risk Management

AI Monitoring Tools

AI Audit Services

AI Governance Framework

Establish clear governance structures for AI by defining accountability, oversight and decision rights while implementing policies and procedures that support ethical, transparent and explainable AI.

AI Risk Management

Design and implement a structured AI risk management framework to consistently identify, assess, mitigate and monitor AI-related risks while aligning with internal policies and regulatory requirements.

RAI Monitoring Tools

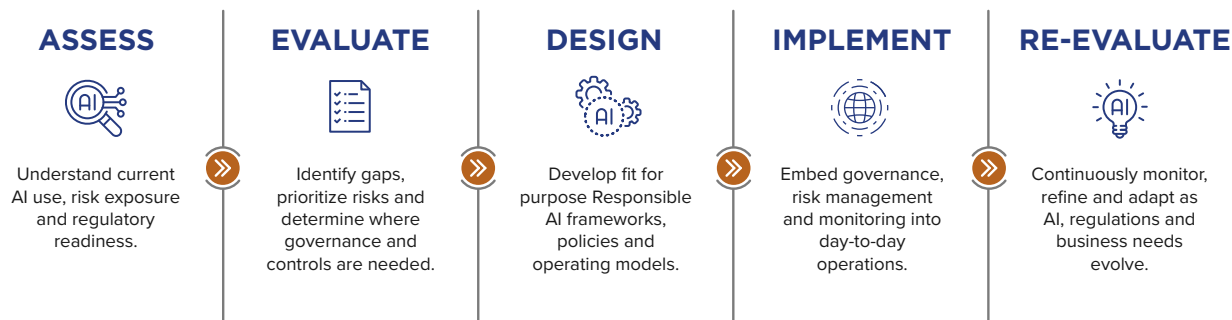

Implement measurable KPIs and monitoring processes to oversee AI system performance and risk, using automated and manual controls to detect deviations from fairness, transparency and accountability standards.

AI Audit Services

Provide independent assurance over AI governance, systems and lifecycle controls, evaluating alignment with internal policies and leading frameworks such as the EU AI Act, NIST AI RMF and ISO/IEC 42001.

How Do We Deliver Responsible AI?

Our Responsible AI solutions follow a practical, repeatable process that helps organizations govern, manage and scale AI.

Why Schneider Downs?

Responsible AI requires expertise across technology, risk, cybersecurity, and business operations. Schneider Downs helps organizations operationalize AI governance with clarity, control and confidence.

Integrated Risk and Technology Expertise

Govern AI systems while protecting data, security and reputation.

Business-Aligned Governance

Embed AI oversight into real operating models and decision-making structures.

Defensible, Audit-Ready Frameworks

Build Responsible AI programs aligned to regulatory and compliance expectations.

End-to-End Delivery

Move from assessment to implementation and continuous improvement.
