

# Unlocking Digital Value Across Construction Operations

At SD Digital, we partner with construction leaders to modernize operations, eliminate manual work, and improve financial and project-level visibility. Our solutions span digital modernization, ERP optimization, analytics and custom development to streamline workflows and generate measurable results.

## Data Analytics

We enhance reporting capabilities by building custom dashboards that deliver insights at the company, project manager, and job levels. Leveraging Power BI and AI, we make data accessible, actionable, and easy to analyze.

## Real-World Impact: Building a Better Impact

A general contractor operating with disconnected systems lacked meaningful oversight of financial performance. We deployed dashboards with risk ratings, cost trending and profit metrics supported by natural-language queries. The result was **stronger budget accountability, clearer financial review cycles, and data-driven decision-making.**

## Digital Modernization

We help contractors rethink their technology environments to support scale, resilience, and operational efficiency. Working within existing systems where possible, we unlock value without unnecessary investment and establish clear priorities for improvement.

## Real-World Impact: A Roadmap for Digital Growth

A growing construction firm struggled with fragmented processes and limited visibility. We developed a digital roadmap that sequenced financial and operational improvements, resulting in **time and cost savings and better-informed management decisions.**

## ERP Optimization and Implementation

We modernize and optimize ERP platforms to support job costing, multi-entity reporting, revenue recognition, WIP management and field-to-office integration. Our team delivers scalable systems that reduce operating risk and enable growth.

## Real-World Impact: Operational Transformation

A hauling company running a legacy Sage platform needed multi-entity support and higher transaction throughput. We implemented Microsoft Business Central with custom features, third-party integrations and a data warehouse, resulting in **reduced IT dependency, improved visibility and long-term scalability.**

## Digital Modernization and Custom Development

We modernize legacy processes by designing and building digital applications that replace manual reporting, digitize field workflows, streamline approvals, and integrate operational data directly into ERP and analytics platforms. The outcome is faster data capture, cleaner reporting, and better financial insight.

## Real-World Impact: Blasting Away Technical Debt

We modernize legacy processes by designing and building digital applications that replace manual reporting, digitize field workflows, streamline approvals, and integrate operational data directly into ERP and analytics platforms. The outcome is **faster data capture, cleaner reporting, and better financial insight.**

### Ready to Get Started?

Reach out to SD Digital to learn how construction leaders are gaining clearer visibility, faster decision-making, and stronger job-level performance. Contact us at [contact@sddigital.com](mailto:contact@sddigital.com).

## About SD Digital

SD Digital helps organizations translate technology to transformative change and realize the best version of themselves. With a forward-thinking cap and digital lens, we empower organizations to realize the art of the possible with the power of digital through business-focused and technology-enabled solutions, built on an unwavering commitment to practicality, speed to market and the user experience.
